

1Fi SDE1 Assignment

Build a simple full-stack web application that displays products (e.g., smartphones) with multiple EMI plans backed by mutual funds, similar to the reference image provided below.

The app should retrieve dynamic data (including product information, pricing, images and EMI plans) from a database via APIs and present it in a responsive, user-friendly web interface.

Reference Image: For the content

Example Webpage: <https://snapmint.com/p/apple-iphone-17-pro-silver-256-gb-smart-phones-on-emi>

Core Functionality

Develop a dynamic product page that includes:

1. Product details: name, variant (e.g., storage or color), MRP, price, and product image.
2. A list of available EMI plans displaying Monthly payment amount, Tenure (in months), Interest rate (e.g., 0% or 10.5%), Cashback information (if applicable). The plans should be select
3. A button to proceed with the selected plan

**The web app must:**

1. Load data from a backend API connected to a database (no hardcoded data)
2. Have unique URLs for each product (e.g., /products/iphone-17-pro, /products/samsung-s24-ultra, etc.).
3. Include at least 3 products, each with 2 or more variants for each (e.g., color, finish, or storage options).

Backend:

1. Create APIs to serve product and EMI plan data (e.g., /api/products, /api/products/:id).
2. Store information in a database (SQL/No-SQL DB).
3. Define the appropriate schema

Tech Stack:

1. Frontend: React, Tailwind CSS or CSS modules
2. Backend: Node.js (Express/Next.js/Nest.js)
3. Database: PostgreSQL/MongoDB, etc.

Deliverables:

1. 2-5 minutes short video showcasing the demo, backend, and database
 - a. Upload the video to your google drive or YouTube
 - b. Please make sure that anyone with a link can view the video
2. GitHub Repository containing
 - a. Database schema and seed data
 - b. README.md with:
 - i. Setup and run instructions
 - ii. API endpoints and example responses
 - iii. Tech stack used
 - iv. Schema used
3. Deployed Demo Link hosted on Vercel, Render or any similar services
